7<sup>th</sup> - 9<sup>th</sup> July 2015

British Association of Dermatologists Annual Meeting 2015, Manchester  
[www.bad.org.uk](http://www.bad.org.uk)

### Dermatology

## Epionce founder wins dermatology award

Founder and CEO of the Epionce skincare line Dr Carl Thornfeldt was presented with the Innovators in Dermatology award at the recent Cosmetic Surgery Forum in Las Vegas.

Dr Thornfeldt has been a practising clinical dermatologist for more than 30 years and created the Epionce line in 2002. He said, "It is an honour to have been chosen for the Innovators in Dermatology award. My first priority has always been to ask the question – 'What is best for my patients?' This award acknowledges the dedication and sacrifices that have brought me to this point in time. I am grateful to the Cosmetic Surgery Forum course director, Dr Joel Schlessinger, for recognising these efforts."

### Anatomy

## Facial Anatomy Teaching poster presented at BACA Meeting

Consultant plastic surgeon Mr Dalvi Humzah and nurse practitioner Anna Baker presented their Facial Anatomy Teaching poster at the British Association of Clinical Anatomists' (BACA) Winter Scientific Meeting, Bristol, on 8 January. Their poster, '21<sup>st</sup> Century Anatomy: A Bespoke Teaching Model for Non-surgical Aesthetic Practice', outlines the key components and concepts that underpin their award-winning facial anatomy teaching model. Of the meeting,

Baker said, "The calibre of speakers and presentations was extremely high and covered a plethora of anatomical specialties, with engaging audience discussion throughout." Baker explained that the poster's content drew the interest of BACA board members, who were particularly interested in discussing the senescent changes analysed in the facial skeleton, as well as the overall concept of their independent teaching. The poster abstract will be published in the *Journal of Anatomy* later this year.

### Clinic

## Dr Roger Amar opens FAMI clinic in London

Founder of the FAMI (Fat Autograph Muscle Injection) Lift Dr Roger Amar has opened a clinic specialising in the treatment. The London FAMI Clinic will specialise in his FAMI technique, offering London patients a treatment which Dr Amar claims is safer and produces a longer-lasting and more natural result than HA fillers or other volumising treatments. The FAMI technique involves grafting stem cells from body fat and injecting them into the facial muscles and bones, using patented cannulae developed specifically for the purpose. "We have more and more UK patients asking for the FAMI Lift," said Dr Amar. "As London is a hub where the Americas meet Europe and Asia, we hope that this London clinic could become a global teaching centre for the FAMI technique."

### Masterclasses

## Industry giants to host Masterclasses at ACE 2015

Global healthcare and pharmaceutical companies, Allergan, Galderma and Sinclair IS Pharma will host Masterclass sessions at this year's Aesthetics Conference and Exhibition (ACE). Each session will provide delegates with key advice from industry leaders sharing their techniques and product expertise. Allergan will host two injectable Masterclasses over the weekend, where key opinion leaders will demonstrate optimum outcomes with the Allergan range, which includes Botox and Juvéderm. Saturday morning will see Sinclair IS Pharma hold a comprehensive session on their product portfolio, while Sunday afternoon will feature a class from Galderma offering guidance on their wide range of products. Held in central London, 7-8 March, these Masterclasses are just a few of the exclusive sessions and learning opportunities offered at ACE 2015.
